

OFFICE OF THE CHIEF ENGINEER PWD RAJASTHAN JAIPUR

No. EE-R&D-III/STA/D- 1502

Date: 19 December 2002

20.12.2002

The Additional Chief Engineer  
PWD Zone Jaipur-I/II/ Ajmer/ Kota

Sub: Scrutiny of PMGSY estimates by STA

Sir,

Difficulty is being felt in getting the estimates scrutinized through STA for several reasons and hence it is requested that all the concerned officers may be directed to follow the following instructions:

1. The estimates would be got checked from this office prior to approaching to STA and hence should bring the estimates 1-2 days in advance.
2. The concerned officers should report in MNIT by 10.30 am on scheduled date.
3. The estimates should have all the required cross sections and L-sections.
4. The observations made by STA in past must be looked into and should be followed for the estimates being brought now.
5. Proper hydraulic calculations for Vented Causeways (as per SP-20) and HP culverts, other culverts and minor bridges must be attached with the estimates. The contour map needs to be provided for HP culverts and minor culvert where catchments area can not be calculated for GT sheet. Otherwise GT sheet be attached showing the catchments area.
6. Where ever the cost of CD work comes in excess of 25%, these should not be deleted but should be brought to the notice of this office. Cost of individual CD work is also not restricted but wherever the cost is more than 25 lacs, this should be brought to the notice of this office.
7. Wherever the road passes through village 50m on either side of village plus village portion should be of CC pavement or stone pavement. However where the length is more than 500m proper plane table survey is to be conducted.
8. In case of any disagreement with; the matter should be reported to this office so as to resolve the matter.
9. Whosever revision of schedule is required this should be informed in time.
