OFFICE OF THE CHIEF ENGINEER, P.W.D., RAJASTHAN, JAIPUR

No. EE (P.W.D.) PWD/93.E-101

Dated : 07.04.2003

Asst. Chief Engineer (All)
P.W.D. Zone _____

Superintending Engineer (All)
P.W.D. Circle _____

Executive Engineer (All)
P.W.D. Circle _____

Construction of road under PMGSY.

Sr.

The roads under PMGSY are being constructed, but it has been observed that quality of works is not upto the mark. Government is very much particular about the quality. Therefore, following instructions be implemented in future, while constructing the roads under PMGSY.

1. Earth work be done in formation width right from bottom to top in prescribed layers;
2. Special attention be paid to compaction of earth work and desired density be achieved;
3. Borrow pits be dug atleast 3 metre away from the edge of the bottom layer of earth work done in formation width;
4. Granular sub-base or grading of hottest be laid only after the Superintending Engineer/ Executive Engineer certifies that the earth work in formation has been completed in full width and density of earth work has been achieved as per requirement;
5. Granular material be of proper gradation and CBR;
6. Consolidation of Base-course be done properly and as far as possible density test be also carried out.
7. Strict supervision be done while doing BT work;
8. Special care be taken to provide camber as prescribed in each layer of earth work, in W/E layers, in BT surface as well as, in hard shoulders.
9. In future, if any road has been given rating of poor/laverage by the NHA then the concerned officers would be held responsible & concerned contractor would be debarred.
