OFFICE OF THE CHIEF ENGINEER & ADDITIONAL SECRE[redacted]
PWD, RAJASTHAN, JAIPUR.

No. F.(184)SE (B)/Circular/D- 392 Date: 06.08.2013

CIRCULAR No. 2/2013-14

In most of the cases it has been observed that in the forecast estimates of building works for Government Departments the provisions of electrical connection and water supply line are either not taken or not being taken correctly.

This practice creates problem on completion of civil work as the electrical connection and water supply are not provided to buildings due to insufficient funds which leads to non handing over of the building.

It is, therefore, enjoined upon all the concerned who prepare the forecast estimates that the provision for electrical connection and water supply connection be kept as per actual location of building. If the land for building is not decided at the time of forecast estimates, it may clearly be mentioned in forecast estimates that it will be the responsibility of concerned department to arrange necessary sanction for electrical and water supply connection. However, the actual provision for electrical connection and water supply line may be taken into account while sanctioning of detailed estimate.

(A.K. Sanghi)
Chief Engineer & Addl. Secretary,
PWD, Rajasthan, Jaipur.
