OFFICE OF THE CHIEF ENGINEER - P.W.D. - RAJASTHAN, JAIPUR

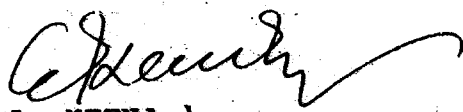

No: Sec.I(A)/Spl.2

Dated: 15/2/2000

CIRCULAR NO.04/2000

It has been observed that roads are frequently cut by P.H.E.D., R.S.E.B., Telephone Department, and Local Bodies for laying pipe lines, electric cables, telephone lines and sewer lines. The repeated repair work of these cuts is costly and causes inconvenience to public also.

Therefore, it is enjoined upon all Additional Chief Engineers, Superintending Engineers, Executive Engineers to incorporate the provision of providing service shafts/ducts at regular intervals across the roads and along the roads specifically on urban roads and stretches of Highways passing through urban areas. These provisions may be incorporated on new roads and in special repair works as per the standards laid down by M.O.S.T. / I.R.C.

(H.L. MEENA)
CHIEF ENGINEER, PWD
RAJASTHAN, JAIPUR.

Copy submitted/ forwarded to the following :-
