

No. SE (NH)/EE NH/2007/D-839

Date: 8 June, 2007

CIRCULAR

It is observed that Kilometre stones / 200 meter stones are not as per IRC/ MORTH standards. Some of them have been sunken due to raising of road by cyclic treatment like renewal, strengthening, IRQP. etc. Many kilometre stones are not visible due to growth of bushes etc. around them. Therefore it is directed that –

1. It must be ensured that all Kilometre stones / 200 kilometre stone be fixed / re-fixed at standard height and at standard distance from carriageway, as per IRC standards.
2. It must also be ensured that Kilometre stones and road side signage are clearly visible. If any obstruction like bushes around it must be removed immediately. If any poster / pamphlet is found pasted on it, the same must be removed immediately
3. The letters / numerals must be written clearly as per IRC / MORTH standards.

By taking care on above mentioned points, convenience can be provided to road users.

The compliance report must be received in this Office by 25.06.2007

Chief Engineer (NH)
