Subject: Required N.O.C for Pollution Control for Hot Mix Plant and Crushers. Working conditions of Labour at site to be followed by contractors as per Labour Law.

Sir,

In the Memo submitted by the Consultants (Technical Examiner) ending, it has been observed that in few cases NOC has not yet been obtained for Pollution Control for the Hot Mix Plant & Crushers establishments of the contractors. However, mostly it has been taken. Therefore, please ensure that N.O.C for HMP and Crushers be obtained by the contractors in all cases so that there shall not be any deficiency.

It is a condition of loan by the World Bank that the working conditions of labour of the contractors should be good and the facilities be provided as per Labour Law. You are requested to kindly see this issue seriously and ensure that contractors to follow the Labour Law strictly so that working conditions of labour at site may be of the good category.

Yours faithfully,

(Signature)
Chief Engineer, P.W.D.
